- ✓ Filters up to 210 litres of water*
- ✓ Unique Disruptor™ 5293 PAC-S technology
- ✓ Powdered Activated Carbon reduces odours and improves the taste
- ✓ Anti-microbial silver disinfects
- ✓ BPA-free food-grade materials
- ✓ Dishwasher safe & recyclable (excl. filter)
- ✓ Compact and lightweight
- ✓ Suitable for everyday use
- ✓ Ergonomically designed
- ✓ Protective cap

PACK CONTENTS

Product Specifications

Filter capacity: 210 litres*

Filter life: 300 refills or 2 months*

**Note: because water quality and volume of consumption varies, filter service life will also vary. It is advised to use municipal water to prolong the lifespan of your filter.*

i Important

In order to increase effectiveness and lifespan of filtration, it is advised to use municipal water. Please contact us for more information.

DIRECTIONS FOR USE

Before first use, remove cap and lid and fill with cold tap water.

Screw lid back on and squeeze all the water out. Repeat step 1 & 2 twice to activate the filter.

DIRECTIONS FOR FILTER REPLACEMENT

Unscrew, remove and discard used filter cartridge.

Screw new cartridge firmly into place.

Fill with cold tap water, squeeze until empty. Repeat once more. The filter is now activated and ready for use.

Did You Know?

- This filter bottle removes more impurities than any other filter, including harmful bacteria, chlorine, particles and more. It also reduces odours and improves taste.
- Our Disruptor™ filters contain PAC-S (Powdered Activated Carbon with anti-microbial silver for disinfection).
- The filter bottle refill cartridges are available in a variety of different colours.
- The water flow is slower than a normal bottle, as it filters the water while you drink.
Note: it is easier to suck the water out than trying to squeeze the bottle.
- The bottle lid has a built-in breather valve which allows air into the bottle, preventing negative pressure from building up inside the bottle.
- The protective cap can double as a drinking cup.

Important Information

- Ensure that you have activated the filter prior to use as per the instructions provided.
- **Do NOT use hot water** (this filter can only filter cold tap water).
- Clean the bottle at least once a week using a mild detergent, ensure that the filter is removed before washing it.
- The bottle is dishwasher safe (top shelf upside down only) but the filter needs to be removed before washing it.
- If the filtered water develops an odour, please replace the filter immediately.
- Keep the bottle away from heating elements eg. oven and coffee machine. Do not use in the microwave.
- Store the bottle in a cool, dry place.
- The bottle itself is recyclable and BPA-free (excluding the filter).
- In order to maintain optimum filtration, it is recommended to replace the filter after 210 litres or 2 months. **Note:** because water quality and volume of consumption varies, filter service life will also vary.
- In order to increase effectiveness and lifespan of filtration, it is advised to use municipal water in this bottle.

Thank you for choosing JoJo's advanced filtration technology. If there is anything that you are unsure of or need assistance with, please do not hesitate to contact us.
